# Mouse Monoclonal Antibodies to +400 Human Transcription Factors & Nuclear Proteins

- ◇ Over 400 unique targets: search list by name, alternate name, or Genbank accession number.
- ◇ Monoclonal antibodies harvested from cells grown in Ig-depleted culture media.
- ◇ Purified by Protein A or Protein G affinity chromatography.
- ◇ Approximate location of immunizing region shown on datasheet.
- ◇ All qualified for Western blotting. Other applications given as tested (IHC, IP, Flow, etc.).
- ◇ Campaign price: 25400 JPY, 242 USD, 195 EUR.
