Catalog No. CE-022A

Anti-INI1/BAF47/SNF5 antibody

BACKGROUND

INI1/BAF47/SNF5 is a core component of the BAF (SWI/SNF) complex. This ATP-dependent chromatin-remodeling complex plays important roles in cell proliferation and differentiation, in cellular antiviral activities and inhibition of tumor formation. The BAF complex is able to create a stable, altered form of chromatin that constrains fewer negative supercoils than normal.
