

Anti soybean ATG8i

BACKGROUND

ATG8 is one of autophagy related genes, a homolog protein of LC3. ATG8 is conjugated with phosphatidyl ethanol amine on its COOH terminal glycine via ATG7 and ATG3, E1-like enzyme system. Higher plants have multiple genes of ATG8 homologs composed of two subfamily, ATG8a-g and ATG8h-i in Arabidopsis. Anti-soybean ATG8i antibody was raised against GST-fused GmATG8i and crossreacts with plant ATG8h,i-related proteins specifically, but not with plant ATG8a-g.

Product type	Primary antibody
Immunogen	GST-GmATG8i
Raised in	Rabbit
Myeloma	-
Clone number	-
Isotype	-
Source	Rabbit serum
Purification	-
Buffer	supplemented with 0.02% NaN ₃ as a preservative
Concentration	-
Volume	50 ul
Label	Unlabeled
Specificity	soybean ATG8i
Cross reactivity	Soybean, arabidopsis, higher plants
Storage	Store below -20C Aliquot to avoid cycles of freeze/thaw..
Other	DDBJ under accession numbers, AB453309 (GmATG8i)

- Application notes**
- **Western blotting:** 1/1000 - 1/2,000 (Ref.1, Fig. 3)
- Recommended dilutions**
- **Immunoprecipitation:** 2 - 5 ug/ 1mL extracts

Other applications have not been tested.
Optimal dilutions/concentrations should be determined by the end user.
