

MONOCLONAL ANTIBODY

For research use only. Not for clinical diagnosis.

Catalog No. KZ-HS-M02

Anti Bovine Inhibin (β A Subunit)

BACKGROUND

Inhibin is an endocrine hormone produced in the ovaries, the testes and the placenta. This hormone has several functions in the body, with inhibin levels in women being linked to the menstrual cycle and playing a role in fetal development. Another hormone, activin, has an action in the body opposite to that of inhibin. Levels of these two hormones tend to fluctuate in both men and women in response to a number of cues which can include changes in hormone levels triggered by natural biological processes, environmental pressure, and other factors.

Product type	Primary antibodies
Host	Mouse
Form	Ascites
Volume	100 μ l
Antigen	32 kDa bovine inhibin
Cross reactivity	Bovine, Ovine, Human, Rat, Mouse
Application notes	Recommended dilutions

IHC : 1/200 - 1/1,000

WB : 1/200 - 1/1,000

Storage	Store below -20°C (below -70°C for prolonged storage). Aliquot to avoid cycles of freeze/thaw.
----------------	---
