

Anti human GR common mouse monoclonal antibody

GR: Glucocorticoid Receptor

Code No	PP-H8031-00
Clone No.	H8031
Lot.	***
Concentration	1 mg/mL
Volume	100 uL
Ig Class	G2a
Description	Glucocorticoid receptor (GR; NR3C1) is a member of steroid receptor (AR, ER, MR, PR). GR is expressed in almost all human tissues and organs. GR binds to its sequences as an homodimer. Two different forms, GRa and GRb, differing in their C-terminal parts were isolated. GRa is the classic GR that binds to glucocorticoids and transactivates or transrepresses glucocorticoid-responsive promoters. GRb does not bind glucocorticoids.

Nomenclature	NR3C1
Genbank	X03225
Origin	Produced in BALB/c mouse ascites after inoculation with hybridoma of mouse myeloma cells (NS-1) and spleen cells derived from a BALB/c mouse immunized with Baculovirus-expressed recombinant human GR alpha (2-60 aa).
Specificity	This antibody specifically recognizes human GR alpha and beta, and cross reacts with mouse and rat GR alpha and beta.
Purification	Ammonium sulfate fractionation
Formulation	Physiological saline with 0.1% NaN ₃ as a preservative.

Application / Recommended Concentration

In order to obtain the best results, optimal working dilutions should be determined by each individual user.

Western Blot	1ug/mL
Non reducing Western Blot	Not yet tested
ELISA	0.3ug/mL
Immunoprecipitation	Decide by use
Supershift Assay	Not yet tested
Chromatin immunoprecipitation	Not yet tested
Immunohistochemistry	10ug/mL

Rat
pancreas
paraffin section

Storage

Store at 2 - 8 °C up to one month. For long-term storage, the solution may be frozen in working aliquots. Repeated freezing and thawing is not recommended. Storage in a frost-free freezer is not recommended.

Reference

Notes

Sodium azide may react with lead and copper plumbing to form explosive metal azides. Flush with large amounts of water during disposal.
