

Anti human HNF4 alpha mouse monoclonal antibody

HNF4 alpha: Hepatocyte Nuclear Factor 4 alpha

through HNF4a9.

Code No	PP-K9218-00
Clone No.	K9218
Lot.	***
Concentration	1 mg/mL
Volume	100 uL
lg Class	G2a
Description	Hepatocyte nuclear factor 4 alpha (HNF4, HNF4a; NR2A1) is a member of orphan nuclear receptor. HNF4a is expressed in the liver, kidney, intestine and

pancreas. Mutation of HNF4a in humans has been associated with maturity-onset diabetes of the young type 1 (MODY1). HNF4 binds to DNA as an exclusive homodimer. The HNF4a gene is alternatively spliced and may generate up to nine different isoforms, HNF4a1

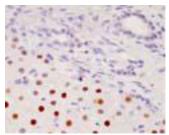

Nomenclature	NR2A1	
Genbank	X87870	
Origin	Produced in BALB/c mouse ascites after inoculation with hybridoma of mouse myeloma cells (NS-1) and spleen cells derived from a BALB/c mouse immunized with Baculovirus-expressed recombinant human HNF4 alpha (3-49 aa).	
Specificity	This antibody specifically recognizes human HNF4 alpha 1- 6 and cross reacts with mouse and rat HNF4 alpha 1-6.	
Purification	Ammonium sulfate fractionation	
Formulation	Physiological saline with 0.1% NaN3 as a	

Application / Recommended Concentration

In order to obtain the best results, optimal working dilutions should be determined by each individual user.

Western Blot	1 ug/mL
Non reducing Western Blot	Not yet tested
ELISA	0.1 ug/mL
Immunoprecipitation	Decide by use
Supershift Assay	Decide by use
Chromatin immunoprecipitation	Not yet tested

Immunohistochemistry 10-20 ug/mL

Human Liver Hepatocyte paraffin section

Rat Intestine Epithelial cell paraffin section

Storage

Store at 2 - 8 °C up to one month. For long-term storage, the solution may be frozen in working aliquots. Repeated freezing and thawing is not recommended. Storage in a frost-free freezer is not recommended.
