

## Anti Prorenin (265-294)(Human) Serum Cat. No. YII-Y191-EX Lot No. 65161005

**Description:** This antiserum was raised in a rabbit by immunization with a carrier free synthetic prorenin (265-294) (human) (equal to preprorenin (288-317) (human) peptide. The product vial contains 50µL of the titled antiserum obtained by lyophilizing its 0.001M phosphate buffer (pH 7.0, 0.5mL) solution. It can be used for immunoassay, immunohistochemistry or any other immunoreaction with prorenin/renin (human).

Immunogen: Synthetic prorenin (265-294) (human), carrier free Host: Rabbit

Amino Acid Sequence of Prorenin (265-294) (human)<sup>1), 2)</sup>, known:

265  $29^{2}$ 

LAL VDTGASYISG STSSIEKLME ALGAKKR

Product Form: Lyophilized unpurified serum Size: 50 µL

**Reconstitution:** Reconstitute the product with 0.5mL of 0.01M PBS (pH 7.0) to make a 10 fold diluted stock solution. If it is stored in a refrigerator, add moderate antiseptic to the solution (e.g. NaN3 0.1%).

**Storage:** The product will be stable for over one year if it be stored at -20°C to -80°C until opened. Upon reconstitution, the antiserum solution must be stored at 2°C to 8°C and used within one month. Reconstituted antiserum solution can also be aliquotted and stored at -20°C to -80°C for six months without marked loss of activity. Repeated freezing- thawing should be avoided.

Suggested Working Dilution Range:  $1:1,000 \sim 5,000$  for enzyme immunoassay;  $1:1,000 \sim 4,000$  for immunohistochemistry (frozen section). Optimal dilution should be determined by each laboratory for each application.

Specificity (based on non-competitive EIA): Prorenin (265-294) (human) 100%, preprorenin (21-64) (human) 0.0%, prorenin (314-337) (human) < 0.1%, prorenin (human, recombinant) 100%, renin (human, recombinant) 100%

Positive Control (immunohistochemistry): Human and rat kidney Species Tested: Human, rat
