## Anti NO Synthase II（77－105）（Rat）Serum

Cat．No．YII－YP051－EX Lot No． 114100514
Description：This antiserum was raised in a rabbit by immunization with a carrier free synthetic NO synthase II（NOS－II，iNOS）（77－105）（rat）peptide．The product vial contains $50 \mu \mathrm{~L}$ of the titled antiserum obtained by lyophi－lizing its 0.001 M phosphate buffer（ $\mathrm{pH} 7.0,0.5 \mathrm{~mL}$ ）solution．It can be used for immunoassay， immunohistoche－mistry or any other immunoreaction with NO synthase II（rat）．

Immunogen：Synthetic NO Synthase II（77－105）（rat），carrier free Host：Rabbit
Amino Acid Sequence of NO Synthase II（77－105）（rat）${ }^{1)}$ ：
77105
TRPQ HVRIKNWGNG EIFHDTLHHK ATSDI
Product Form：Lyophilized unpurified serum Size： $50 \mu \mathrm{~L}$
Reconstitution：Reconstitute the product with 0.5 mL of 0.01 M PBS（ pH 7.0 ）to make a 10 fold diluted stock solution．If it is stored in a refrigerator，add moderate antiseptic to the solution（e．g．NaN3 0．1\％）．

Storage：The product will be stable for over one year if it be stored at $-20^{\circ} \mathrm{C}$ to $-80^{\circ} \mathrm{C}$ until opened．Upon recon－stitution，the antiserum solution must be stored at $2^{\circ} \mathrm{C}$ to $8^{\circ} \mathrm{C}$ and used within one month．Repeated freezing－thawing should be avoided．

Suggested Working Dilution Range：1：1，000 for immunohistochemistry（frozen section）．Optimal dilution should be determined by each laboratory for each application．

Specificity（based on radioimmunoassay）：NO synthase II（rat）100\％，NO Synthase II（mouse） $70 \%$ ，NO Synthase I（rat） $0 \%$ ，NO Synthase III（rat） $0 \%$

Positive Control（immunohistochemistry）：Cytokine treated rat hepatocytes and smooth muscle cells

Species Tested：Rat
