

# Recombinant Mouse C-X-C motif chemokine 11 protein (Cxcl11) (Active)

|                            |                                                                                                                                                                                                  |
|----------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Product Code</b>        | CSB-AP001151MO                                                                                                                                                                                   |
| <b>Abbreviation</b>        | Recombinant Mouse Cxcl11 protein (Active)                                                                                                                                                        |
| <b>Uniprot No.</b>         | Q9JHH5                                                                                                                                                                                           |
| <b>Form</b>                | Lyophilized powder                                                                                                                                                                               |
| <b>Storage Buffer</b>      | Lyophilized from a 0.2 µm filtered PBS, pH 7.4                                                                                                                                                   |
| <b>Product Type</b>        | Chemokine                                                                                                                                                                                        |
| <b>Immunogen Species</b>   | Mus musculus (Mouse)                                                                                                                                                                             |
| <b>Biological Activity</b> | Fully biologically active when compared to standard. The biological activity determined by a chemotaxis bioassay using murine CXCR3 transfected 293 cells is in a concentration of 10-100 ng/ml. |
| <b>Purity</b>              | >98% as determined by SDS-PAGE.                                                                                                                                                                  |

| <b>Protein Length</b>      | Full Length of Mature Protein                                                                                                                                                                    |
| <b>PubMed ID</b>           | 10828609; 10843686                                                                                                                                                                               |

## Image

**Endotoxin**

Less than 1.0 EU/μg as determined by LAL method.

**Reconstitution**

We recommend that this vial be briefly centrifuged prior to opening to bring the contents to the bottom. Please reconstitute protein in deionized sterile water to a concentration of 0.1-1.0 mg/mL. We recommend to add 5-50% of glycerol (final concentration) and aliquot for long-term storage at -20°C/-80°C. Our default final concentration of glycerol is 50%. Customers could use it as reference.

**Shelf Life**

The shelf life is related to many factors, storage state, buffer ingredients, storage temperature and the stability of the protein itself. Generally, the shelf life of liquid form is 6 months at -20°C/-80°C. The shelf life of lyophilized form is 12 months at -20°C/-80°C.
