

Recombinant Human Adenylate kinase isoenzyme 1 (AK1)

Product Code CSB-EP001508HU Catalyzes the reversible transfer of the terminal phosphate group between A and AMP. Also displays broad nucleoside diphosphate kinase activity. Plays important role in cellular energy homeostasis and in adenine nucleotide metabolism. Abbreviation Recombinant Human AK1 protein Storage The shelf life is related to many factors, storage state, buffer ingredients, storage temperature and the stability of the protein itself. Generally, the shelf of liquid form is 6 months at -20°C/-80°C. The shelf life of lyophilized form is months at -20°C/-80°C.	an

(Tris-Glycine gel) Discontinuous SDS-PAGE (reduced) with 5% enrichment gel and 15% separation gel.

Reconstitution

We recommend that this vial be briefly centrifuged prior to opening to bring the contents to the bottom. Please reconstitute protein in deionized sterile water to a concentration of 0.1-1.0 mg/mL.We recommend to add 5-50% of glycerol (final concentration) and aliquot for long-term storage at -20°C/-80°C. Our default final concentration of glycerol is 50%. Customers could use it as reference.

Shelf Life

The shelf life is related to many factors, storage state, buffer ingredients, storage temperature and the stability of the protein itself. Generally, the shelf life of liquid form is 6 months at -20°C/-80°C. The shelf life of lyophilized form is 12 months at -20°C/-80°C.
