

## Recombinant Gadus morhua Trypsin-1

| <b>Product Code</b>  | CSB-EP018811GER   |
|--|---|
| Abbreviation   | Recombinant Gadus morhua Trypsin-1 protein  |
| Storage  | The shelf life is related to many factors, storage state, buffer ingredients, storage temperature and the stability of the protein itself. Generally, the shelf life of liquid form is 6 months at -20°C/-80°C. The shelf life of lyophilized form is 12 months at -20°C/-80°C.   |
| Uniprot No.  | P16049  |
| Form   | Liquid or Lyophilized powder  |
| Storage Buffer   | If the delivery form is liquid, the default storage buffer is Tris/PBS-based buffer, 5%-50% glycerol. If the delivery form is lyophilized powder, the buffer before lyophilization is Tris/PBS-based buffer, 6% Trehalose.  |
| Product Type   | Recombinant Protein   |
| Immunogen Species  | Gadus morhua(Atlantic cod)  |
| Purity   | Greater than 90% as determined by SDS-PAGE.   |
| Sequence   | IVGGYECTKHSQAHQVSLNSGYHFCGGSLVSKDWVVSAAHCYKSVLRVRLGE  |

## **CUSABIO TECHNOLOGY LLC**

(Tris-Glycine gel) Discontinuous SDS-PAGE (reduced) with 5% enrichment gel and 15% separation gel.

## Reconstitution

We recommend that this vial be briefly centrifuged prior to opening to bring the contents to the bottom. Please reconstitute protein in deionized sterile water to a concentration of 0.1-1.0 mg/mL.We recommend to add 5-50% of glycerol (final concentration) and aliquot for long-term storage at -20°C/-80°C. Our default final concentration of glycerol is 50%. Customers could use it as reference.

## **Shelf Life**

The shelf life is related to many factors, storage state, buffer ingredients, storage temperature and the stability of the protein itself. Generally, the shelf life of liquid form is 6 months at -20°C/-80°C. The shelf life of lyophilized form is 12 months at -20°C/-80°C.
