## Description

In expressing the recombinant *Drosophila melanogaster* (Fruit fly) Ect4 protein, *e.coli* cells are transfected with a DNA expression vector that harbors the gene for the desired protein

(370-678aa(A386L,H392R,T433V,T434A,L595S,A596D,H599Q)). The cultured cells then express the intended protein. The protein is equipped with a N-terminal 6xHis tag. The recombinant *Drosophila melanogaster* (Fruit fly) Ect4 protein is collected and purified from the cell lysate through affinity purification, achieving a purity surpassing 85%, as confirmed by SDS-PAGE.

## Reconstitution

We recommend that this vial be briefly centrifuged prior to opening to bring the contents to the bottom. Please reconstitute protein in deionized sterile water to a concentration of 0.1-1.0 mg/mL. We recommend to add 5-50% of glycerol (final concentration) and aliquot for long-term storage at -20°C/-80°C. Our default final concentration of glycerol is 50%. Customers could use it as reference.

## Shelf Life

The shelf life is related to many factors, storage state, buffer ingredients, storage temperature and the stability of the protein itself.

Generally, the shelf life of liquid form is 6 months at -20°C/-80°C. The shelf life of lyophilized form is 12 months at -20°C/-80°C.
