

Recombinant Gadus morhua Parvalbumin beta

Product Code	CSB-EP852688GER
Relevance	In muscle, parvalbumin is thought to be involved in relaxation after contraction. It binds two calcium ions
Abbreviation	Recombinant Gadus morhua Parvalbumin beta protein
Storage	The shelf life is related to many factors, storage state, buffer ingredients, storage temperature and the stability of the protein itself. Generally, the shelf life of liquid form is 6 months at -20°C/-80°C. The shelf life of lyophilized form is 12 months at -20°C/-80°C.
Uniprot No.	Q90YK9
Alias	Allergen: Gad m 1
Product Type	Recombinant Protein
Immunogen Species	Gadus morhua (Atlantic cod)
Purity	Greater than 90% as determined by SDS-PAGE.
Sequence	AFAGILNDADITAALAACKAEGSFDHKAFFTKVGLAAKSPADIKKVFEIIDQDKS DFVEEDELKFLQNFSAARALSDAETKVFLKAGDSDGDGKIGVDEFGAMIKA
Research Area	Allergen
Source	E.coli
Expression Region	2-109aa
Notes	Repeated freezing and thawing is not recommended. Store working aliquots at 4°C for up to one week.
Tag Info	N-terminal 6xHis-SUMO-tagged
Mol. Weight	27.4kDa
Protein Length	Full Length of Mature Protein

Image

(Tris-Glycine gel) Discontinuous SDS-PAGE (reduced) with 5% enrichment gel and 15% separation gel.

Reconstitution

We recommend that this vial be briefly centrifuged prior to opening to bring the contents to the bottom. Please reconstitute protein in deionized sterile water to a concentration of 0.1-1.0 mg/mL. We recommend to add 5-50% of glycerol (final

concentration) and aliquot for long-term storage at -20°C/-80°C. Our default final concentration of glycerol is 50%. Customers could use it as reference.

Shelf Life

The shelf life is related to many factors, storage state, buffer ingredients, storage temperature and the stability of the protein itself.

Generally, the shelf life of liquid form is 6 months at -20°C/-80°C. The shelf life of lyophilized form is 12 months at -20°C/-80°C.
