

# Recombinant Human E3 ubiquitin-protein ligase TRAIP (TRAIP)

Product Code         CSB-EP866296HUa0           Relevance         E3 ubiquitin ligase acting as a negative regulator of innate immune signaling. Inhibits activation of NF-kappa-B mediated by TNF. Negatively regulates TLR3/4- and RIG-I-mediated IRS7 activation and subsequent IFNB1 production and cellular antiviral response by promoting "Lys-48"-linked polyubiquitination of TNK1 leading to its proteasomal degradation. Involved in response to genotoxic becisons during genome replication. Promotes H2AX and RPA2 phosphorylation after replication-associated DNA damage and assists fork progression at UV-induced replication-blocking lesions during S phase. Has also been proposed to lay a role in promoting translesion synthesis by mediating the assembly of "Lys-63"-linked poly-ubiquitin chains on the Y-family polymerase POLN in order to facilitate bypass of DNA lesions and preserve genomic integrity. The function in translesion synthesis is controversial           Abbreviation         Recombinant Human TRAIP protein           Storage         The shelf life is related to many factors, storage state, buffer ingredients, storage temperature and the stability of the protein itself. Generally, the shelf life of liquid form is 6 months at -20°C/-80°C. The shelf life of lyophilized form is 12 months at -20°C/-80°C.           Uniprot No.         Q9BWF2           Product Type         Recombinant Protein           Immunogen Species         Homo sapiens (Human)           Purity         Greater than 85% as determined by SDS-PAGE. #### **Notes**

Repeated freezing and thawing is not recommended. Store working aliquots at 4°C for up to one week.

## Tag Info

N-terminal 6xHis-tagged

## Mol. Weight

58.8 kDa

#### **Protein Length**

Full Length

#### **Image**

(Tris-Glycine gel) Discontinuous SDS-PAGE (reduced) with 5% enrichment gel and 15% separation gel.

#### Reconstitution

We recommend that this vial be briefly centrifuged prior to opening to bring the contents to the bottom. Please reconstitute protein in deionized sterile water to a concentration of 0.1-1.0 mg/mL.We recommend to add 5-50% of glycerol (final concentration) and aliquot for long-term storage at -20°C/-80°C. Our default final concentration of glycerol is 50%. Customers could use it as reference.

#### **Shelf Life**

The shelf life is related to many factors, storage state, buffer ingredients, storage temperature and the stability of the protein itself. Generally, the shelf life of liquid form is 6 months at -20°C/-80°C. The shelf life of lyophilized form is 12 months at -20°C/-80°C.
