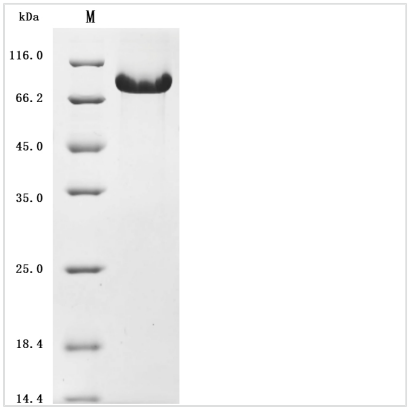
Recombinant Human Complement component C1q receptor (CD93), partial (Active)

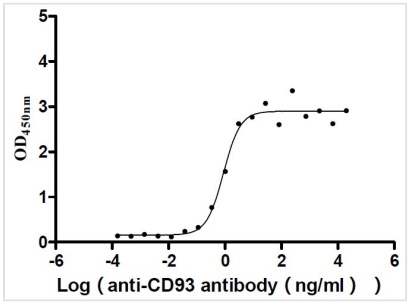
Product Code	CSB-MP865099HU
Abbreviation	Recombinant Human CD93 protein, partial (Active)
Storage	The shelf life is related to many factors, storage state, buffer ingredients, storage temperature and the stability of the protein itself. Generally, the shelf life of liquid form is 6 months at -20°C/-80°C. The shelf life of lyophilized form is 12 months at -20°C/-80°C.
Uniprot No.	Q9NPY3
Form	Lyophilized powder
Storage Buffer	Lyophilized from a 0.2 μm filtered 20 mM Tris-HCl, 0.5 M NaCl, 6% Trehalose, pH 8.0
Product Type	Recombinant Protein
Immunogen Species	Homo sapiens (Human)
Biological Activity	Measured by its binding ability in a functional ELISA. Immobilized Human CD93 at 2 μg/mL can bind Human IGFBP7 (CSB-MP620956HUd9), the EC_{50} is 20.34-26.92 ng/mL.Measured by its binding ability in a functional ELISA. Immobilized Human CD93 at 2 μg/mL can bind Anti-CD93 recombinant antibody (CSB-RA865099MA1HU), the EC_{50} is 0.6639-1.173 ng/mL.
Purity	Greater than 90% as determined by SDS-PAGE. Greater than 90% as determined by SEC-HPLC.
Sequence	TGADTEAVVCVGTACYTAHSGKLSAAEAQNHCNQNGGNLATVKSKEEAQHV QRVLAQLLRREAALTARMSKFWIGLQREKGKCLDPSLPLKGFSWVGGGEDTP YSNWHKELRNSCISKRCVSLLLDLSQPLLPSRLPKWSEGPCGSPGSPGSNIEG FVCKFSFKGMCRPLALGGPGQVTYTTPFQTTSSSLEAVPFASAANVACGEGD KDETQSHYFLCKEKAPDVFDWGSSGPLCVSPKYGCNFNNGGCHQDCFEGG DGSFLCGCRPGFRLLDDLVTCASRNPCSSSPCRGGATCVLGPHGKNYTCRC PQGYQLDSSQLDCVDVDECQDSPCAQECVNTPGGFRCECWVGYEPGGPGE GACQDVDECALGRSPCAQGCTNTDGSFHCSCEEGYVLAGEDGTQCQDVDE CVGPGGPLCDSLCFNTQGSFHCGCLPGWVLAPNGVSCTMGPVSLGPPSGPP DEEDKGEKEGSTVPRAATASPTRGPEGTPKATPTTSRPSLSSDAPITSAPLKM LAPSGSPGVWREPSIHHATAASGPQEPAGGDSSVATQNNDGTDGQK
Source	Mammalian cell
Target Names	CD93
Expression Region	22-580aa
Notes	Repeated freezing and thawing is not recommended. Store working aliquots at 4°C for up to one week.
Tag Info	C-terminal 10xHis-tagged

Mol. Weight	60.1 kDa
Protein Length	Partial

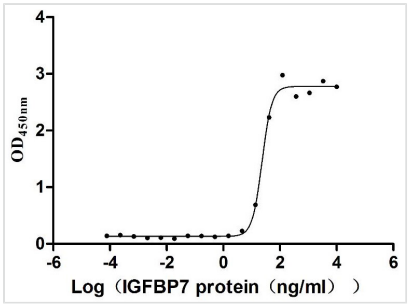
Image



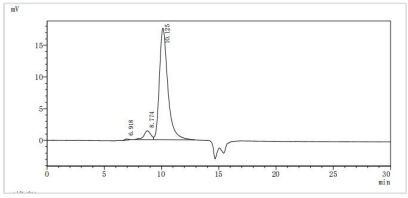
(Tris-Glycine gel) Discontinuous SDS-PAGE (reduced) with 5% enrichment gel and 15% separation gel.



Activity
Measured by its binding ability in a functional ELISA. Immobilized Human CD93 at 2 μg/ml can bind Anti-CD93 recombinant antibody (CSB-RA865099MA1HU), the EC_{50} is 0.6639-1.173 ng/mL.



Activity
Measured by its binding ability in a functional ELISA. Immobilized Human CD93 at 2 μg/ml can bind Human IGFBP7 (CSB-MP620956HUd9), the EC_{50} is 20.34-26.92 ng/mL.



The purity of CD93 was greater than 90% as determined by SEC-HPLC

Description

CD93, also called complement component 1, q subcomponent receptor (C1qRp), is a protein found on the surface of different cell types like endothelial cells, white blood cells, and stem cells [1][2]. It's involved in lots of important jobs in the body, including helping blood vessels grow, controlling inflammation, and cleaning up dead cells [3][4][5][6][7][8][9][10][11][2]. In cancer, CD93 seems to help blood vessels form in tumors by organizing cells and structures within them [3]. It's also important in diseases like age-related macular degeneration, where it affects inflammation and blood vessel growth in the eye [8][7]. CD93

even helps clear away dead cells by shedding a part of itself, acting as a signal for other cells to come and clean up [5][12]. Plus, it's involved in the process of cells engulfing and digesting other cells, and it interacts with certain proteins to help regulate this process [11]. In development, CD93 seems to have a say in how certain cells grow and stick together [6][10]. Overall, CD93 is a potential target for treatments that aim to stop blood vessel growth in diseases like pancreatic cancer [13].

Endotoxin	Less than 1.0 EU/ug as determined by LAL method.
Reconstitution	We recommend that this vial be briefly centrifuged prior to opening to bring the contents to the bottom. Please reconstitute protein in deionized sterile water to a concentration of 0.1-1.0 mg/mL.We recommend to add 5-50% of glycerol (final concentration) and aliquot for long-term storage at -20?/-80?. Our default final concentration of glycerol is 50%. Customers could use it as reference.
Shelf Life	The shelf life is related to many factors, storage state, buffer ingredients, storage temperature and the stability of the protein itself. Generally, the shelf life of liquid form is 6 months at -20°C/-80°C. The shelf life of lyophilized form is 12 months at -20°C/-80°C.
