

Recombinant Escherichia coli 30S ribosomal protein S8 (rpsH)

Product Code	CSB-RP085874Ba
Relevance	One of the primary rRNA binding proteins, it binds directly to 16S rRNA central domain where it helps coordinate assbly of the platform of the 30S subunit. Protein S8 is a translational repressor protein, it controls the translation of the spc operon by binding to its mRNA.
Abbreviation	Recombinant E.coli rpsH protein
Storage	The shelf life is related to many factors, storage state, buffer ingredients, storage temperature and the stability of the protein itself. Generally, the shelf life of liquid form is 6 months at -20°C/-80°C. The shelf life of lyophilized form is 12 months at -20°C/-80°C.

Reconstitution

We recommend that this vial be briefly centrifuged prior to opening to bring the contents to the bottom. Please reconstitute protein in deionized sterile water to a concentration of 0.1-1.0 mg/mL. We recommend to add 5-50% of glycerol (final concentration) and aliquot for long-term storage at -20°C/-80°C. Our default final concentration of glycerol is 50%. Customers could use it as reference.

Shelf Life
